

INDRA BHAN VERMA

Full Stack Developer

📍 Noida, Uttar Pradesh | ✉ indrabhan919@gmail.com | ☎ 8052860685 | [in LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech (IT) graduate skilled in full-stack web development using Node.js, Express.js, MySQL, and JavaScript. Built three end-to-end projects covering authentication, and responsive UI design, with live deployments. Comfortable learning new tools quickly and using AI-assisted workflows (ChatGPT, GitHub Copilot) to build and debug efficiently. Looking for an entry-level Software/Web Developer role.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python

Frontend: HTML5, CSS3, EJS, Responsive Design

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, Firebase

Developer Tools: Git, GitHub, VS Code, Eclipse, Android Studio, Postman

Deployment / Hosting: Render, GitHub Pages, Aiven, Infinity Free

Generative AI: ChatGPT, GitHub Copilot, AI-Assisted Software Development

PROJECTS

Fair Fare — Public Transport Route & Fare Estimate App

Academic Project (Final Year B.Tech) | Android Studio, JavaScript, Maps API, REST APIs, Firebase

- Built an application enabling users to find optimal public transport routes and estimate travel fares in real time
- Integrated Maps API to display live routes, nearby stops, and user location
- Designed a responsive, user-friendly interface using JavaScript and HTML
- Gained hands-on experience in mobile app development, API integration, and debugging

Ravindra Studio — Online Photo Frame Store

Personal Project | Node.js, Express.js, MySQL, EJS

- Developed a dynamic e-commerce store with user authentication, cart management, and an admin dashboard
- Built backend logic with Express.js and managed relational data with MySQL
- Designed a responsive, shape-themed UI using HTML, CSS, and EJS templating
- Implemented session-based authentication for secure user and admin access
- Built a manual UPI/QR-code payment verification system using screenshot uploads, avoiding third-party payment gateway costs
- Deployed the application live on Render, gaining experience with full-stack deployment

Online Grocery Store Web Application

Academic Project (3rd Year B.Tech) | PHP, MySQL, HTML, CSS, Bootstrap

- Developed a dynamic online grocery store with user authentication, cart management, and an admin dashboard
- Implemented backend logic in PHP with MySQL for data management
- Designed a responsive UI using HTML, CSS, and Bootstrap
- Implemented session-based authentication for secure user access
